

# EDENiA®

## Company Overview

December 2024

# A journey that started before web1

1987

## Rodrigo Fernández

Founder, Chairman & Chief Strategist

Committed to a culture of transparency, I champion individual freedom through technological advancements.

## Edgar Fernández

Co-founder & Finance and Enterprise Lead

My entrepreneurial spirit thrives on harnessing decentralized technologies to empower innovation.

## Xavier Fernández

Co-founder & Technical Lead

I see blockchain as a pivotal tool for our generation, addressing unique challenges with innovative solutions.

# Why Costa Rica?

- Political Stability
- Investment in Education
- Tech Focus
- Strategic location / Time Zone
- Sustainability

2008

The image features a central blue circle with the word "EDENiA" in white. Three lines of different colors (teal, yellow, and green) extend from the right side of the circle to three separate callout boxes. Each box has a colored dot at its top-left corner where it meets the line. The boxes contain text about Edenia's infrastructure, data center, and blockchain expertise.

**EDENiA**

**World-Class Internet Infrastructure with a Legacy**

Harness Our 30+ Years of Expertise in Dedicated Servers, Cloud Computing, and Kubernetes Solutions.

**Eco-Friendly and Geographically Unique Data Center**

Benefit from Costa Rica's Sustainable Energy and Unique Location for Resilient, Global Blockchain Networks.

**Trailblazers in Blockchain Infrastructure**

Capitalize on Edenia's Proven Expertise in Deploying and Managing Secure, Efficient Blockchain Networks.

# Our Services

## Blockchain Network Launches

Harnessing the power of Antelope.io and EOSIO protocols, we've been pivotal in launching various blockchain networks.

## dApp Development

Creating decentralized applications that push the boundaries of user interaction and functionality.

## Smart Contract Creation

Developing secure and efficient smart contracts tailored to diverse business requirements.

## Blockchain Consulting

Providing expert insights to navigate the intricate blockchain technology landscape.

# Our Success Stories

## Minequest

**Integration between large gaming platform and public blockchain**

A system that allows the Alien Worlds Community to create quests with in-game rewards for actions completed while playing Minecraft on the Alien Worlds Community Minecraft servers.

## Defactor

**Token-powered ecosystem which facilitates the tokenisation of real world assets**

Bridging the gap between Trad-Fi and DeFi, the Defactor mission is to create the infrastructure and 'rails' for the creation of new business models all around the world.

## Pixel Heroes

**Play to Earn NFT Game**

An innovative project that merges the essence of MMORPGs with cutting-edge blockchain technology.

# Why Edenia for Web3 Development?

## Extensive Experience:

From our inception in 1987 to becoming blockchain pioneers since 2013.

## Specialized Knowledge:

Proficient in EOSIO/Antelope protocols, setting us apart in the tech arena.

## Innovative Approach:

Focused on impactful MVPs and proof of concepts leading to success stories.

## Proven Track Record:

Numerous projects funded by organizations like the Ethereum Foundation, EOS Network, and Telos Network.
